

§ 11.21

regulations for an aircraft, aircraft engine, or propeller design do not contain adequate or appropriate safety standards, because of a novel or unusual design feature.

GENERAL

§ 11.21 What are the most common kinds of rulemaking actions for which FAA follows the Administrative Procedure Act?

FAA follows the Administrative Procedure Act (APA) procedures for these common types of rules:

- (a) Rules found in the Code of Federal Regulations;
- (b) Airworthiness directives issued under part 39 of this chapter; and
- (c) Airspace Designations issued under various parts of this chapter.

§ 11.23 Does FAA follow the same procedures in issuing all types of rules?

Yes, in general, FAA follows the same procedures for all rule types. There are some differences as to which FAA official has authority to issue each type, and where you send petitions for FAA to adopt, amend, or repeal each type. Assume that the procedures in this subpart apply to all rules, except where we specify otherwise.

§ 11.25 How does FAA issue rules?

(a) The FAA uses APA rulemaking procedures to adopt, amend, or repeal regulations. To propose or adopt a new regulation, or to change a current regulation, FAA will issue one or more of the following documents. We publish these rulemaking documents in the FEDERAL REGISTER unless we name and personally serve a copy of a rule on every person subject to it. We also make all documents available to the public by posting them in the Department of Transportation's electronic docket at <http://dms.dot.gov>.

- (1) An advance notice of proposed rulemaking (ANPRM).
- (2) A notice of proposed rulemaking (NPRM).
- (3) A supplemental notice of proposed rulemaking (SNPRM).
- (4) A final rule.
- (5) A final rule with request for comments.
- (6) A direct final rule.

14 CFR Ch. I (1–1–02 Edition)

(b) Each of the rulemaking documents in paragraph (a) of this section generally contains the following information:

- (1) The topic involved in the rulemaking document.
- (2) FAA's legal authority for issuing the rulemaking document.
- (3) How interested persons may participate in the rulemaking proceeding (for example, by filing written comments or making oral presentations at a public meeting).
- (4) Whom to call if you have questions about the rulemaking document.
- (5) The date, time, and place of any public meetings FAA will hold to discuss the rulemaking document.
- (6) The docket number and regulation identifier number (RIN) for the rulemaking proceeding.

§ 11.27 Are there other ways FAA collects specific rulemaking recommendations before we issue an NPRM?

Yes, the FAA obtains advice and recommendations from rulemaking advisory committees. One of these committees is the Aviation Rulemaking Advisory Committee (ARAC), which is a formal standing committee comprised of representatives of aviation associations and industry, consumer groups, and interested individuals. In conducting its activities, ARAC complies with the Federal Advisory Committee Act and the direction of FAA. We task ARAC with providing us with recommended rulemaking actions dealing with specific areas and problems. If we accept an ARAC recommendation to change an FAA rule, we ordinarily publish an NPRM using the procedures in this part. The FAA may establish other rulemaking advisory committees as needed to focus on specific issues for a limited period of time.

§ 11.29 May FAA change its regulations without first issuing an ANPRM or NPRM?

The FAA normally adds or changes a regulation by issuing a final rule after an NPRM. However, FAA may adopt, amend, or repeal regulations without first issuing an ANPRM or NPRM in the following situations:

- (a) We may issue a final rule without first requesting public comment if, for

good cause, we find that an NPRM is impracticable, unnecessary, or contrary to the public interest. We place that finding and a brief statement of the reasons for it in the final rule. For example, we may issue a final rule in response to a safety emergency.

(b) If an NPRM would be unnecessary because we do not expect to receive adverse comment, we may issue a direct final rule.

§ 11.31 How does FAA process direct final rules?

(a) A direct final rule will take effect on a specified date unless FAA receives an adverse comment or notice of intent to file an adverse comment within the comment period—generally 60 days after the direct final rule is published in the *FEDERAL REGISTER*. An adverse comment explains why a rule would be inappropriate, or would be ineffective or unacceptable without a change. It may challenge the rule's underlying premise or approach. Under the direct final rule process, we do not consider the following types of comments to be adverse:

(1) A comment recommending another rule change, in addition to the change in the direct final rule at issue. We consider the comment adverse, however, if the commenter states why the direct final rule would be ineffective without the change.

(2) A frivolous or insubstantial comment.

(b) If FAA has not received an adverse comment or notice of intent to file an adverse comment, we will publish a confirmation document in the *FEDERAL REGISTER*, generally within 15 days after the comment period closes. The confirmation document tells the public the effective date of the rule.

(c) If we receive an adverse comment or notice of intent to file an adverse comment, we will advise the public by publishing a document in the *FEDERAL REGISTER* before the effective date of the direct final rule. This document may withdraw the direct final rule in whole or in part. If we withdraw a direct final rule because of an adverse comment, we may incorporate the commenter's recommendation into another direct final rule or may publish a notice of proposed rulemaking.

§ 11.33 How can I track FAA's rule-making activities?

The best ways to track FAA's rule-making activities are with the docket number or the regulation identifier number.

(a) *Docket number*. We assign a docket number to each rulemaking proceeding. Each rulemaking document FAA issues in a particular rulemaking proceeding, as well as public comments on the proceeding, will display the same docket number. This number allows you to search DOT's Docket Management System (DMS) for information on most rulemaking proceedings. You can view and copy docket materials during regular business hours at the U.S. Department of Transportation, Plaza Level 401, 400 7th Street, SW., Washington, DC 20590-0001. Or you can view and download docketed materials through the Internet at <http://dms.dot.gov>. If you can't find the material in the electronic docket, contact the person listed under **FOR FURTHER INFORMATION CONTACT** in the document you are interested in.

(b) *Regulation identifier number*. DOT publishes a semiannual agenda of all current and projected DOT rulemakings, reviews of existing regulations, and completed actions. This semiannual agenda appears in the Unified Agenda of Federal Regulations, published in the *FEDERAL REGISTER* in April and October of each year. The semiannual agenda tells the public about DOT's—including FAA's—regulatory activities. DOT assigns a regulation identifier number (RIN) to each individual rulemaking proceeding in the semiannual agenda. This number appears on all rulemaking documents published in the *FEDERAL REGISTER* and makes it easy for you to track those rulemaking proceedings in both the *FEDERAL REGISTER* and the semiannual regulatory agenda.

§ 11.35 Does FAA include sensitive security information and proprietary information in the Docket Management System (DMS)?

(a) *Sensitive security information*. You should not submit sensitive security information to the rulemaking docket, unless you are invited to do so in our request for comments. If we ask for
